To: All Fastener Distributors

We realize Safety Socket Screw Corporation is known in the industry as a manufacturer of premium quality socket drive products. We also realize that our cold-heading equipment allows us to produce a wide variety of parts. As a result, Safety Socket has expanded capabilities to manufacture ***special engineered fasteners*** (as shown above). Our strengths are fasteners that are made to print, have critical delivery requirements, both ferrous and non-ferrous (exotic stainless) materials, PPAPs, SPC documentation and close tolerance parts.

***When quality and competitive pricing are critical
Call Safety Socket***
